

**BLACK** lines defines Azure entities relations (for example virtual machines in a subscription)  
**BLACK** lines are totally inferred from Azure cloud by the **cmdcloudconnector** tool

**RED** lines defines relations from the "business" point of view (for example which resources make up an application)  
**RED** lines are inferred from Azure using TAGS

**VIOLET** lines defines relations to object you need to define on your CMDB to complete the "business" view.
